too much cellulose for the digestive apparatus to properly care for, but when fed with bran, oats, roots, alfalfa or other laxative feeds it makes a good winter ration for cattle.

Bristol's Dyspeptic Pig

Story of an Up to Date Farmer

By CLARRA MACKIE

The man above from Frank Bristol's model farm, but there was no man in the heart of his owner, and there appeared to be gladness in the soul of the owner's pig. That stout, black bristled beast, perched on a bed of clean straw and eating the clean wall of its scientifically built cement pen.

The model farmer sat on the top of the cement wall watching his black pig with anxious eyes. The pig had been lying there since morning, occasionally noticing the trough full of sweet milk and potato parings that Bristol's housekeeper had reluctantly placed there.

"Sweet milk! too good for pigs, Mr. Bristol," Ann Dangler said sharply as she dared.

"Sweet food makes sweet pork," replied the model farmer coolly, and Ann had turned her head and returned her kitchen to bang the pots and fiddle the oven.

"It looks as if it was going to make good this time," the grand old man grumbled.

Quite regardless of Ann Dangler's opinion, Frank Bristol continued to sit on the wall of his pig pen and contemplate the porcine form of his solitary occupant. He was a large, middle-aged man, with a high forehead, a thick nose, and a pair of eyes that were as sharp as a hawk's.

"It's indigestion," concluded the model farmer, again consulting the farm manual issued by his alma mater—the agricultural college of the University of Illinois.

"This book says to 'compel the animal to take exercise—put it with a stick until it runs until it is tired.' In fact, this model of treatment, combined with a feeding of white corn, formed of two parts of white corn to one part of skim milk, will restore the pig to normal health. Hm! I guess I'll get to tell Ann to make the grub."

"Make grub for a sick pig—never!" cried Ann Dangler when Mr. Bristol mildly made this suggestion, waving the farm manual as he spoke.

"Why not, Ann?"

"Because it's all nonsense. Leave him alone. Mr. Bristol, and he'll be right. He's too clean to be real healthy. Why, I've seen him for years and years in all kinds of pens, and I never heard of one being sick before. This one took cold from your turning the hose on him the other day."

"If you'll have the grub ready at 4 o'clock I'll come in for it," was Mr. Bristol's reply to this pointed language.

When she was alone, Ann Dangler mostly stirred the fire and kept a kettle of skimmed milk. That was all she had to do. It was expected that there was room for only one pig on the model farm.

Nevertheless Bristol had provided himself with the necessary pork in the shape of a bushel of corn and had made his way to the pigpen.

The animal was breathing heavily, now and then grunting and snorting. Frank Bristol opened the patent gate and stepped inside, closing the gate behind him. He went up to the unsuspecting porker and prodded him gently with the sharp end of the broomstick.

"What are you doing in there?" demanded a nasal voice.

Bristol turned around. "Ah, Mr. Bristol, here you are!"

"Pretty fair, don't seem to be nothing the matter with your pig."

"I'm forcing him to take a little exercise," said Bristol, once more jabbing the pig with the broomstick and sidestepping as the animal snorted and snorted.

"He's got a bad case of indigestion, and I'm trying to cure it."

Ben Dangle opened a capacious mouth and snorted. "What's he doing in there?" he questioned between ruffs. "If he's really sick, Mr. Bristol, you better make him drink a mug of hot beefsteak and make him drink it. That'll do him more good than running around like that. Haven't you?" cried to visit violent exercises. "That's his nature!" he said.

"This one seems to take to it—pretty naturally!" puffed Bristol, as he dodged to and fro, getting in and out of the pig's pen.

"You talk as though you know more about the matter than I do, young man, before long!" was Ben Dangle's ominous parting word to his guest.

Frank Bristol had realized this all right. Whatever had been the matter with his pig, the animal had appeared to have recovered from the malady with unexpected rapidity and, try as he might, the model farmer could not escape from the path of the charge. He had lost more than the patient gate and got out of the pen.

Now and then the race around the enclosure revealed a steady discharge of saliva.

that was when the pig felt belated a little. Once Frank turned and yelled "stop!" at the pig, just as a wound would have done, but the pig only trotted he went to the ground and charged at him.

"I'll win—I shall!" made this wall of cement—his pig's pen—was to be dodged a sudden fence of the pig and was gently compelled to jump over the wall.

"I'll win—I shall!" made this wall of cement—his pig's pen—was to be dodged a sudden fence of the pig and was gently compelled to jump over the wall.

One look was the shrill utterance of Ann Dangler; the other voices belonged to the girl but for whom he would never have become a farmer. He had once been engaged to Violet Sloan, but Violet's lovely aunt had been turned by the worship of a dozen other suitors, and they had quarreled, and she had taken to scientific farming. "Getting into a nature," was one way of saying it.

"Here's the pigpen most likely," Ann Dangler was saying in a hoarse voice.

"Humph!" shrieked Violet Sloan's aunt, who was in the habit of being in such a fitful place.

"Pity!" returned Ann Dangler. "I wouldn't pity except for this one. 'Taint natural for a pig to live in a clean, airy place. Why, I've seen him turn the hose on him once a week, and that's what he's doing now. The pig has caught cold from eating too much sweet milk and potato parings."

"Nonsense," retorted Violet. "Who ever heard of one thing turning into another? If Frank must raise pigs I'll give them as nice clean pens as a cement pig pen."

"Humph!" was Ann's reply as she followed the daintily dressed girl to the pig pen.

"Ah, here is a pig. Shall we go and 'taint' him?" asked Violet Sloan, who was waiting for the model farmer to wait for the patient gate.

"Nonsense," retorted Violet. "Who ever heard of one thing turning into another? If Frank must raise pigs I'll give them as nice clean pens as a cement pig pen."

"Humph!" was Ann's reply as she followed the daintily dressed girl to the pig pen.

"Ah, here is a pig. Shall we go and 'taint' him?" asked Violet Sloan, who was waiting for the model farmer to wait for the patient gate.

"Nonsense," retorted Violet. "Who ever heard of one thing turning into another? If Frank must raise pigs I'll give them as nice clean pens as a cement pig pen."

"Humph!" was Ann's reply as she followed the daintily dressed girl to the pig pen.

"Ah, here is a pig. Shall we go and 'taint' him?" asked Violet Sloan, who was waiting for the model farmer to wait for the patient gate.

"Nonsense," retorted Violet. "Who ever heard of one thing turning into another? If Frank must raise pigs I'll give them as nice clean pens as a cement pig pen."

"Humph!" was Ann's reply as she followed the daintily dressed girl to the pig pen.

"Ah, here is a pig. Shall we go and 'taint' him?" asked Violet Sloan, who was waiting for the model farmer to wait for the patient gate.

"Nonsense," retorted Violet. "Who ever heard of one thing turning into another? If Frank must raise pigs I'll give them as nice clean pens as a cement pig pen."

"Humph!" was Ann's reply as she followed the daintily dressed girl to the pig pen.

"Ah, here is a pig. Shall we go and 'taint' him?" asked Violet Sloan, who was waiting for the model farmer to wait for the patient gate.

"Nonsense," retorted Violet. "Who ever heard of one thing turning into another? If Frank must raise pigs I'll give them as nice clean pens as a cement pig pen."

"Humph!" was Ann's reply as she followed the daintily dressed girl to the pig pen.

"Ah, here is a pig. Shall we go and 'taint' him?" asked Violet Sloan, who was waiting for the model farmer to wait for the patient gate.

THE FLOCK MASTER.

Poorly fed sheep will not produce very good wool or good mutton.

Do not attempt to winter more sheep than can be done without cost.

Sheep are comfort lovers, and the more they migrate to provide them with good, dry shelter, the more costly error.

It is a good idea to feed and long to make good mothers and produce vigorous offspring. In this way lambs of a better type will be produced.

In judging sheep do not forget a constant supply of good fresh water and rock salt is a necessity also plenty of good fresh bedding and always a dry lot.

THE HAMPSHIRE HOG.

Bred Noted For Hardiness and Power of Reproduction.

The Hampshire hog first attracted my attention at the International 1904, when an Iowa farmer in a corner of the exhibit.

"Getting into a nature," was one way of saying it.

"Here's the pigpen most likely," Ann Dangler was saying in a hoarse voice.

"Humph!" shrieked Violet Sloan's aunt, who was in the habit of being in such a fitful place.

"Pity!" returned Ann Dangler. "I wouldn't pity except for this one. 'Taint natural for a pig to live in a clean, airy place. Why, I've seen him turn the hose on him once a week, and that's what he's doing now. The pig has caught cold from eating too much sweet milk and potato parings."

HUMPY'S MISSION

His Troubles in Returning a Borrowed Stepladder.

EVERYBODY GIVES HIM ADVICE

And the More He Takes the Greater His Embarrassment Until He Feels the Strong Arms of the Law and Sees Jail Yawning For Him.

By M. QUAD.

(Copyright, 1911, by Associated Literary Press.)

"HUMPY," said Mrs. Skinner the other morning to her eldest and only son, "I wish you were like other boys."

"What's the matter with you?" asked.

"You are not what is called a responsible boy."

"I wish I would like to see the boy who is more responsible than I am!"

"If you go on as you are, I can never tell when you'll get back or what you'll do."

"I think I'll be home in a week."

"You were born for a cowboy and you won't buy a horse or a gun. What do you want to do?"

"There's that step ladder your father borrowed of the cleaver across on Elm street two weeks ago and promised to return next day. If you were a responsible boy I'd have you take it back."

"I'll take it back."

"You'll take it back?"

"I'll take it back."

Synopsis of Canadian Northwest Land Regulations.

Any person who is the sole head of a family or any male over 18 years of age, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency on certain conditions, by father, mother, son, daughter, brother or sister of the homesteader.

Duties—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 30 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price \$5.00 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may enter for a purchased homestead. In certain districts the price \$5.00 per acre. Duties—Must reside six months in each of six years, cultivate fifty acres and erect a house worth \$500.00. Coal—Coal mining rights may be leased for a period of twenty-one years renewable at an annual rental of \$1.00 per acre, not more than 3,000 acres shall be leased to one individual or company. A royalty at the rate of five cents per ton shall be collected on the merchantable coal mined.

Something should be done by the different governments to make ocean travel more safe. They should regulate the course travelled, also the speed, and require all boats doing a passenger business to carry sufficient life boats to take care of the passengers and crew. Why take the risk by speeding the boats across the water in order to save a few hours time when so many human lives are at stake?

To Move Old House and Build New One

Charles Oakland has decided to move his frame house that he is now occupying to one of the lots he has just recently purchased and build a brick residence of the present size. Another good addition to the upper end of town.

New Brick Residence.

Ray Cruick, who has just bought lots 23 and 24 in block 52, has decided to build a handsome brick residence on the same. This is in the upper end of town and will be a welcome addition to that section.

Presented With Purse.

Miss Tillie Woods, who has had charge of the dining room of the Redcliff Hotel for some time past, left last Thursday for Strathmore. Before leaving the old time guest presented her with a substantial purse in token of the "courteous treatment" they had received from her while she had been at the hotel. Miss Woods wishes to thank the guests through the REVIEW for the remembrance.

WEAKENS THE HOME

Prof. Ross, of the University of Wisconsin Deplores Divorce Evil.

"Each divorce granted in America today is a blow at the institution of marriage and the home, and has a bad effect on the conduct of married men, the hold of crystallized religion on the people is weakening; people are growing less submissive to a code of honesty and women are asking themselves the question, 'Why should I be loyal to my husband when I like someone else better?'"

There are some of the statements made in a lecture at the University of Wisconsin at Minneapolis by Prof. Edward A. Ross, of the department of sociology of the University of Wisconsin. Prof. Ross had as his subject "Modern Tendencies," and located it from the standpoint of sociology.

"One thing that can be observed is the weakening hold of crystallized religion. There is less creed and dogma, less superstition than at any previous time in our history," Prof. Ross said. "Motive drawn from the consideration of heaven and hell have less weight. The grip of the forces that represents the thinking of dead men of the past is weaker. But the service of God is lying written into the service of man, and the religious spirit today is stronger than 25 years ago in the sense of an increasing desire to retain individual life to the bigger things outside of life."

These are some of the questions which the people of today are asking themselves, according to Prof. Ross.

"Why do I have to be poor when others are rich?"

"Why must I be hampered by honesty and veracity when others profit by lies?"

"Why must one be loyal to a husband when there is someone else one likes better?"

"The people ask these questions and they are not satisfied," said Prof. Ross. "There is a tendency to apply to their conduct the rule that anything is all right if it does another no harm. As a result we are getting a code of ethics that does not fill the bill."
